Document on harmonized methodological framework for the measurement of SDG and Sendai indicators related to disasters

Biennial program of activities 2020-2021
Background

- The Working Group on measurement and recording of indicators related to disaster risk reduction in Latin America and the Caribbean GT-RRD recognizes that:

  - **10 member countries:** Bolivia, Chile, Colombia, Cuba, Ecuador, México, Nicaragua, Perú, Paraguay y República Dominicana.
  - **Coordinating countries:** Paraguay y Perú.
  - **Technical secretary:** UNDRR.
  - **Support for:** AEA-CEPAL, ONU-Ambiente, UNFPA, IGGRD-GIZ.
General Objective

Prepare a framework document that facilitates the systematic and periodic generation of statistical information on disaster risk and dangerous events, related to economic, social and environmental impacts; including codes of good practice for validation in official statistics, contributing to Disaster Risk Management (GRD), in Latin America and the Caribbean.
Specific Objectives

1. Generate a framework document related to disasters and DRR, with the participation of the ONE, based on the implementation of codes of good statistical practice promoting the validation of data and information to reports.

2. Contribute to the definition/adaptation of recommendations of high relevance and in the development of metadata of related indicators in DRR.

3. Facilitate the integration of LAC countries into global efforts for the identification, dissemination and application of methodologies for measuring indicators and processing statistical data related to DRM.
Content

– Self-diagnosis of gaps and availability of variables related to disasters and DRR.

– The role of the ONE and the mechanisms of inter-institutional coordination.

– On the definition or adaptation of recommendations of high relevance for the region.

– Regional proposal for statistical classification related to disasters.
Results

Framework document: As a contribution to the production of statistics related to disasters and DRR, based on the use of good statistical practices for the use of administrative records.
## Activity Program

<table>
<thead>
<tr>
<th>Activity</th>
<th>Start</th>
<th>Finished</th>
</tr>
</thead>
<tbody>
<tr>
<td>✓ Produce a tool for self-diagnosis of gaps and availability of variables on disasters and DRR in LAC, in order to respond to the 38 indicators of the Sendai Framework, including the 5 of the SDGs.</td>
<td>January 2020</td>
<td>December 2021</td>
</tr>
<tr>
<td>✓ Contribute to the definition or adaptation of recommendations of high relevance for the countries of our region and in the use of administrative records for the production of SDG and Sendai indicators.</td>
<td>May 2020</td>
<td>November 2021</td>
</tr>
<tr>
<td>✓ Develop a regional proposal for statistical classification related to disasters, which contemplates socionatural and anthropic threats.</td>
<td>September 2020</td>
<td>November 2021</td>
